Government

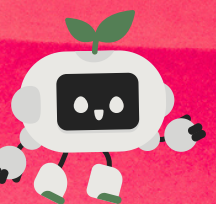

OUR PORTFOLIO

OUR WORK

Since our founding in the 80s, we've executed a lot of projects. Here are some of our favorite ones created for the people we're proud to partner with:

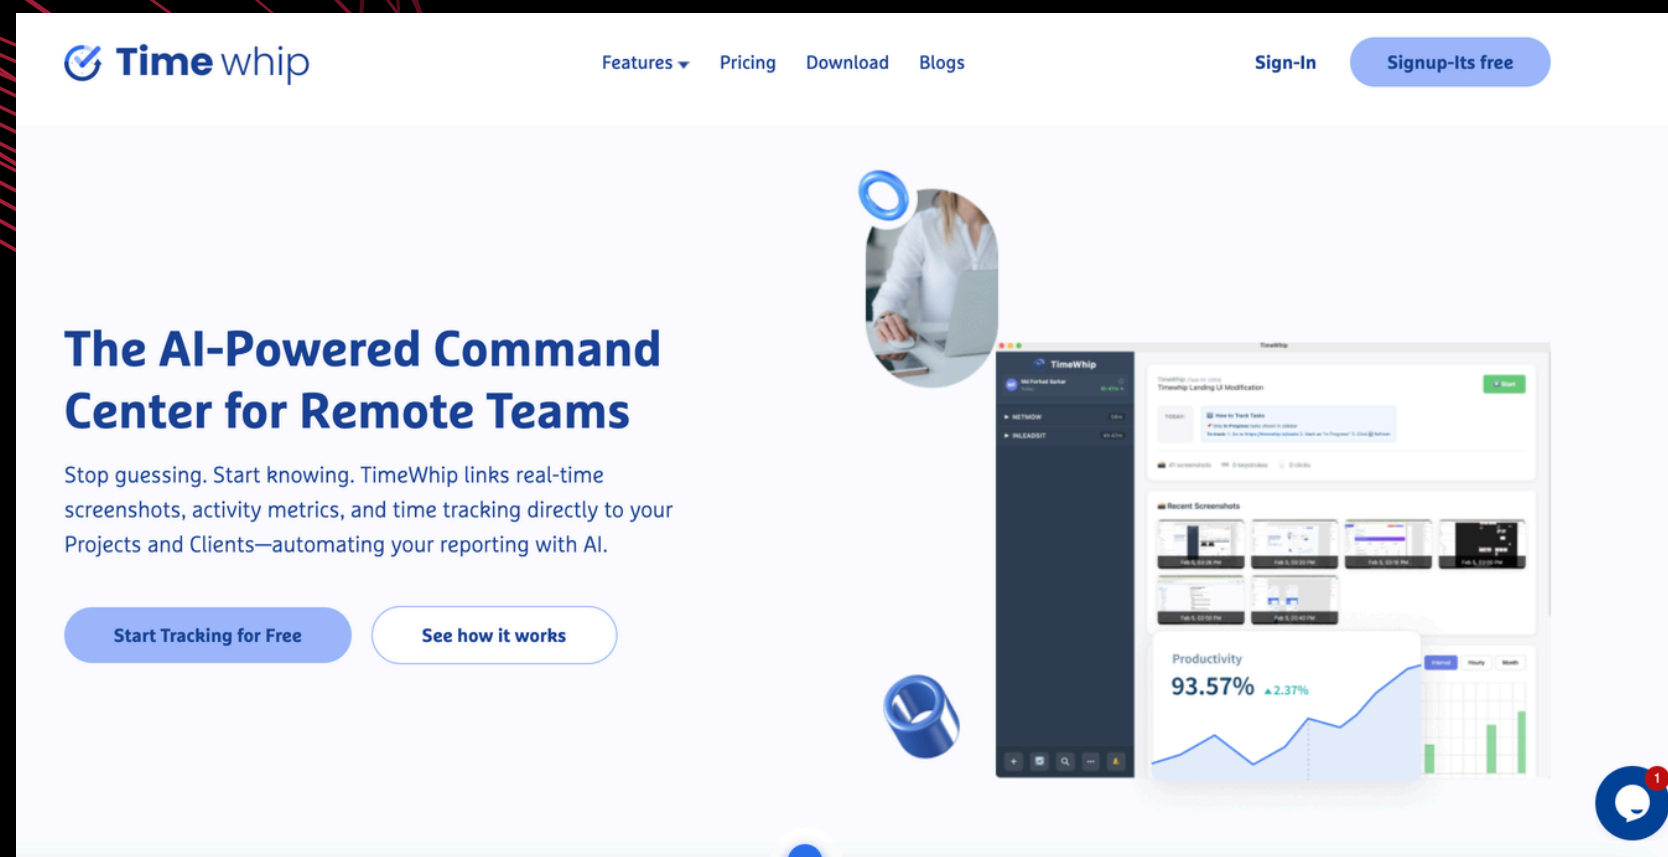

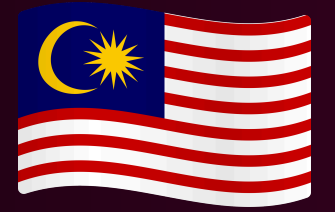

WORK

TimeWhip

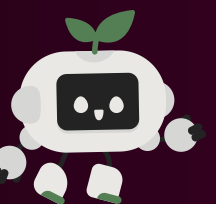

The Friction

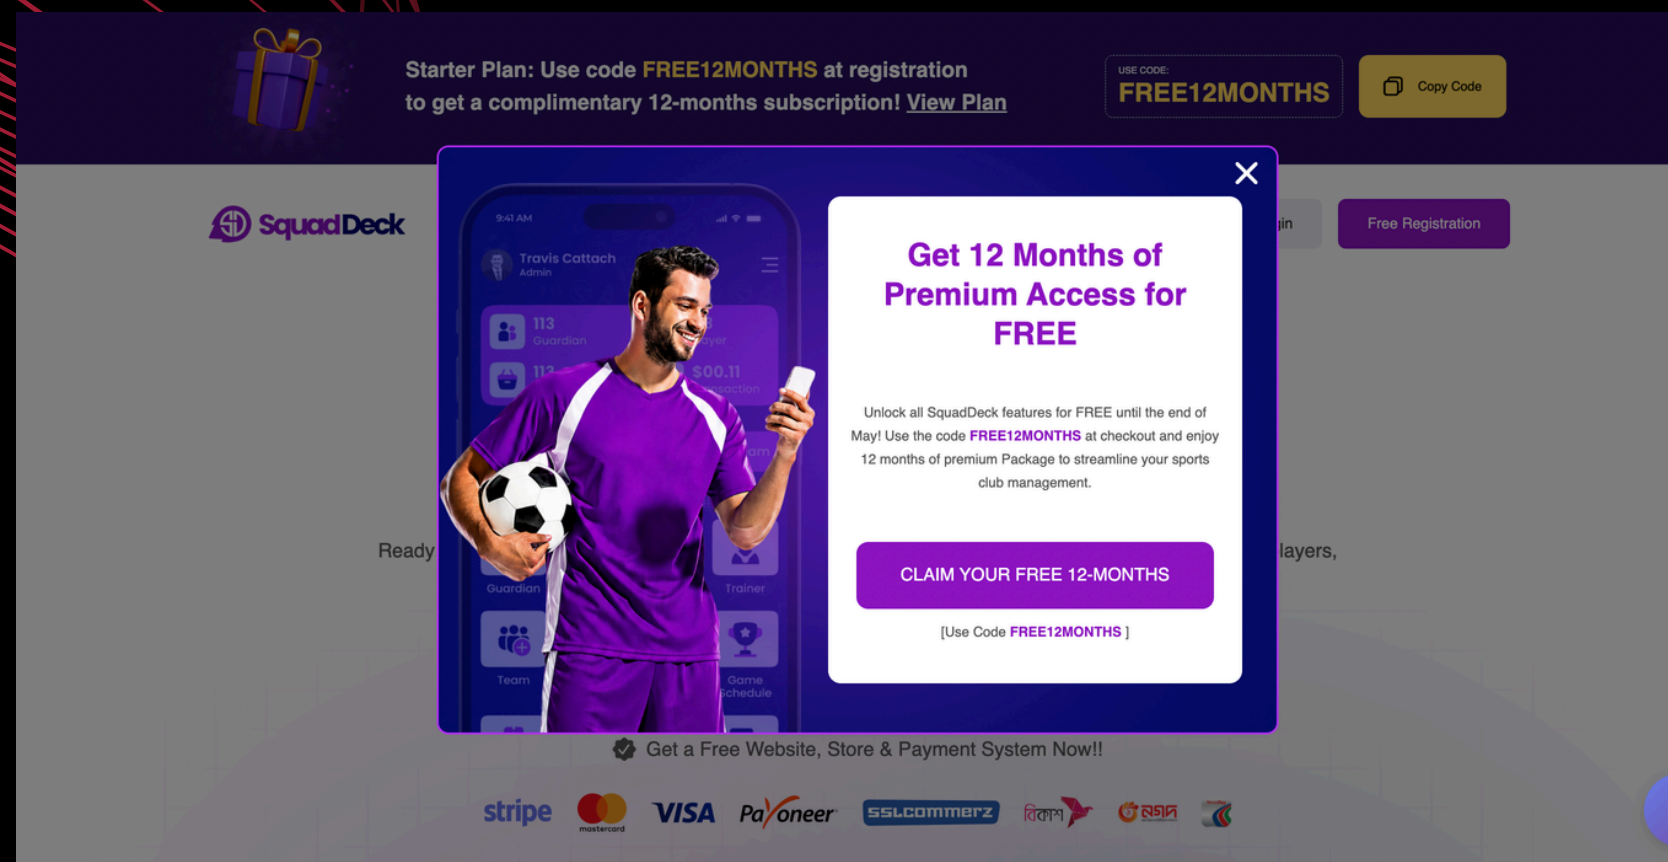

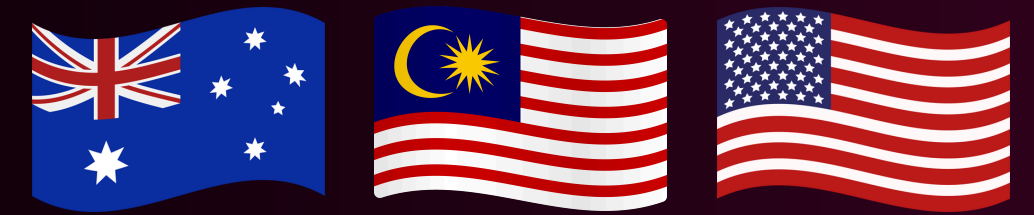

Owners worry that teams are slacking, while employees burn out trying to prove they are working. This **"blame game"** wastes revenue, ruins company culture, and leaves everyone asking, **"Who is actually doing what?"**

The Solution

TimeWhip replaces the guesswork with Automated AI Data, giving owners clear visibility, employees instant proof of their hard work, and management a data-driven evaluation tool.

An **AI-powered** command center and intelligent workforce analytics platform that completely automates team management by turning daily operations into clear, verifiable data.

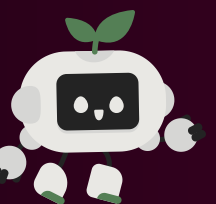

The Friction

Sports clubs, schools, and universities are drowning in administrative chaos, using a messy mix of WhatsApp groups, spreadsheets, and manual tracking to manage schedules, roster registrations, and late membership fees.

The Solution

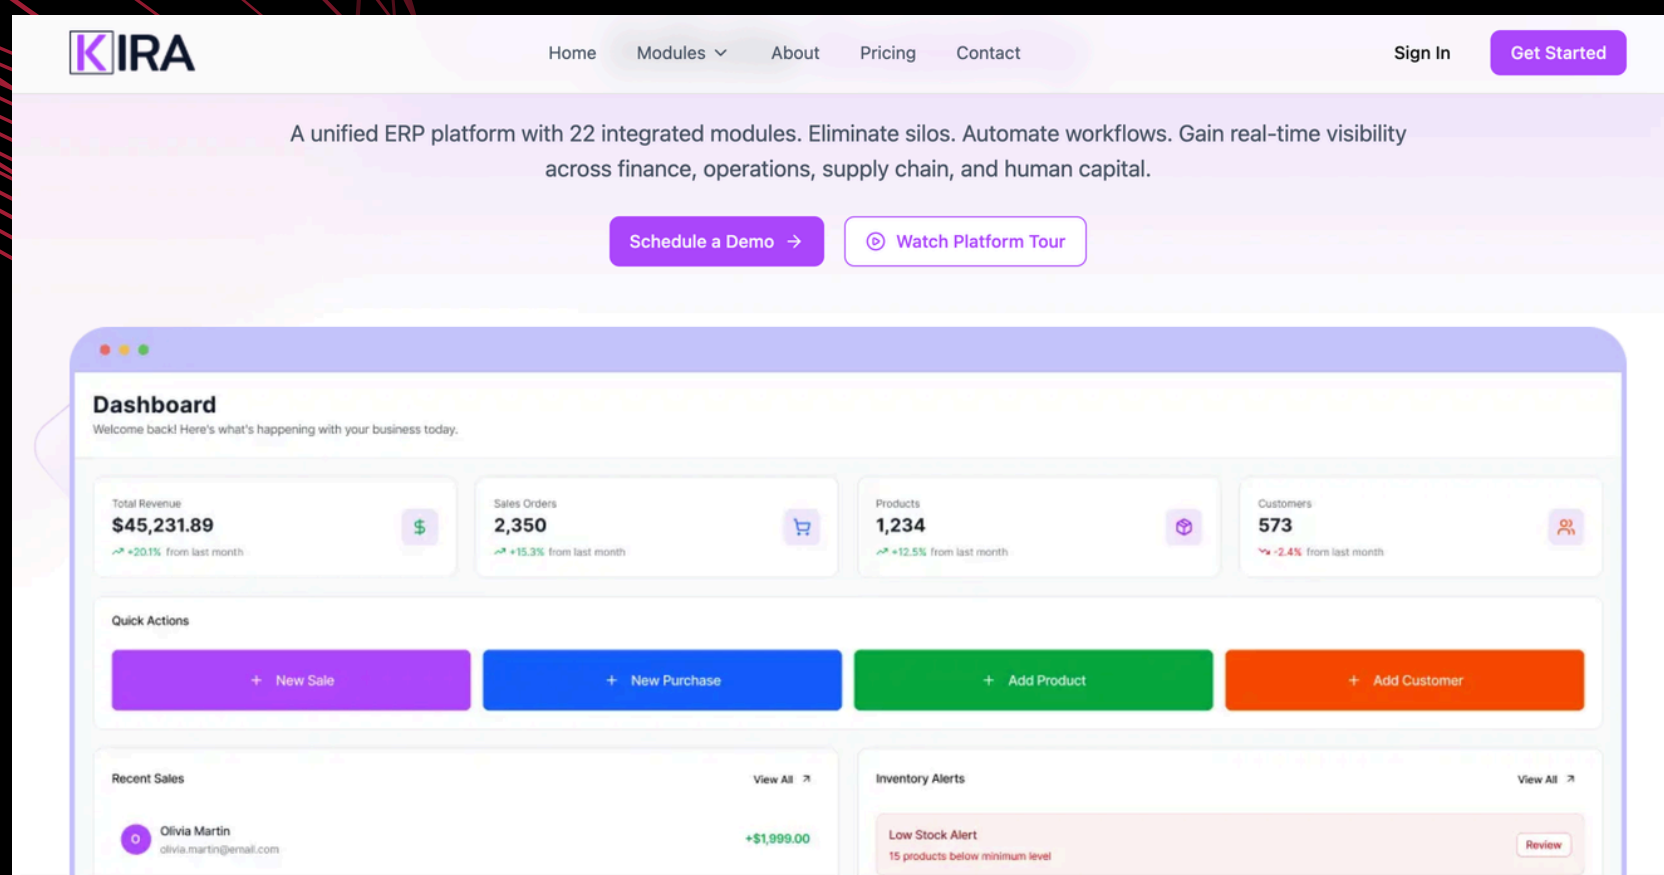

SquadDeck is an elite, all-in-one SaaS platform that automates league logistics, unifies coach-parent communication, and secures digital payments to turn schools, universities, and local sports academies into scalable ecosystems.

SquadDeck is an all-in-one SaaS platform that unifies scheduling, parent communication, and secure payments into a single dashboard, eliminating administrative chaos so sports academies and leagues can scale effortlessly.

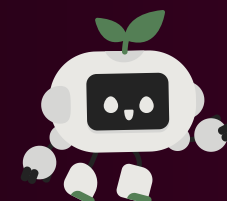

5,000+ Active Users | 50+ Countries Empowered

Built for Your Industry

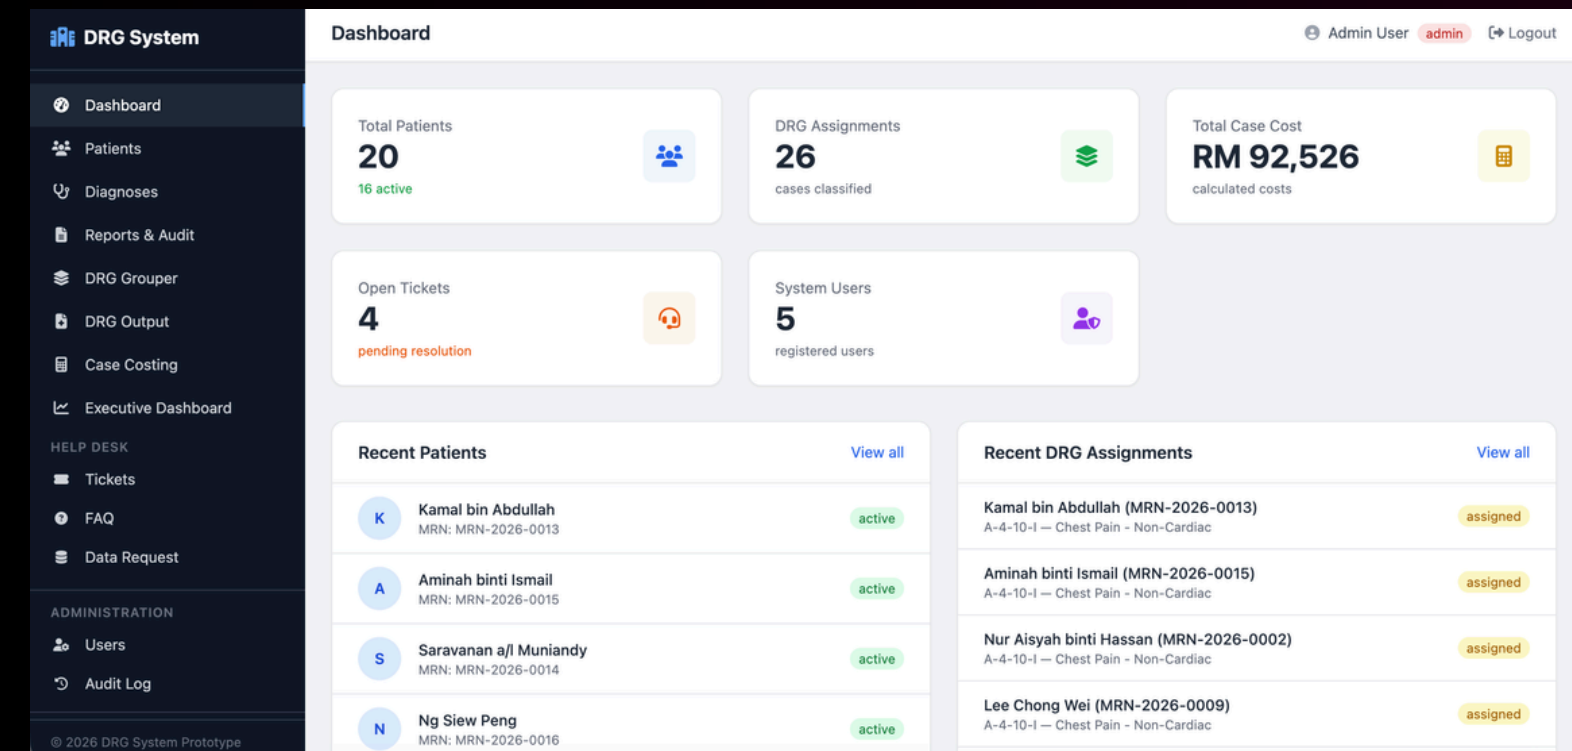

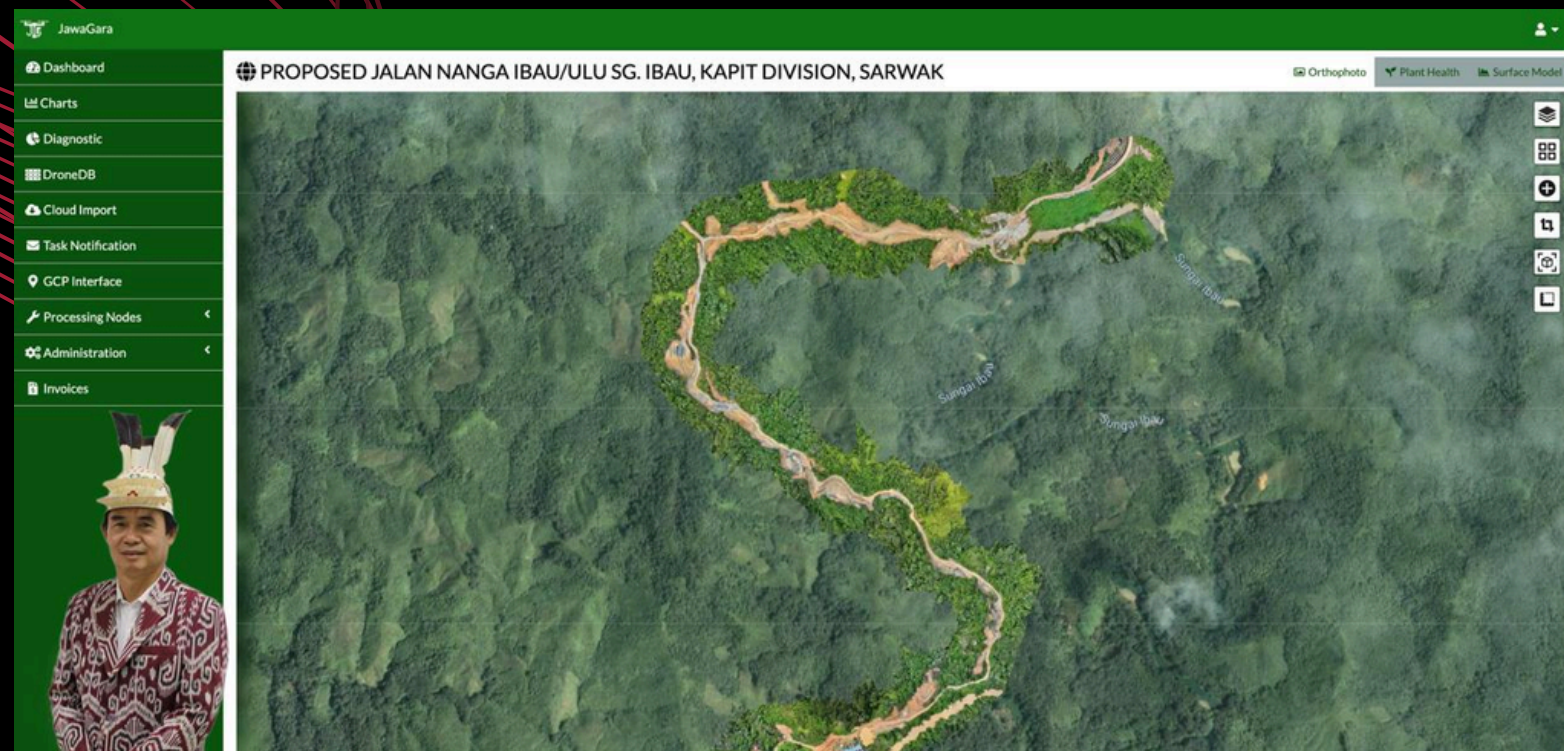

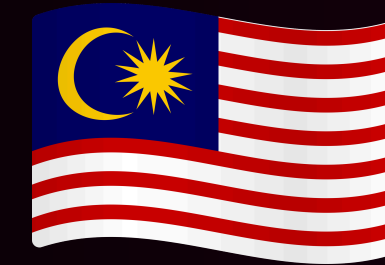

- **Manufacturing:** Production planning, BOM management, and shop floor control.
- **Wholesale & Distribution:** Multi-warehouse inventory, order management, and route optimization.
- **Professional Services:** Project accounting, resource allocation, and time tracking.
- **Healthcare & Pharma:** Batch tracking, regulatory compliance, and supply chain visibility.
- **Technology & Software:** Subscription billing, revenue recognition, and financial consolidation.
- **Logistics & Transportation:** Fleet management, route planning, and real-time tracking.

KIRA is a unified, **SaaS-based ERP platform** that integrates **22 modules** to eliminate operational silos. Trusted by over 5,000 active users across 50 countries, it automates complex workflows and provides real-time visibility across enterprise operations.

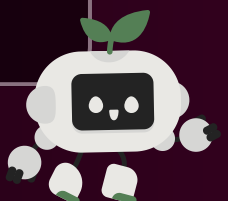

Enterprise Traction & Credibility

Trusted by Governments

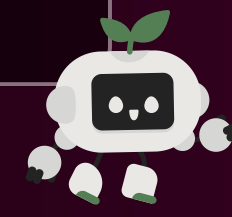

The Sarawak Government (Regional Auto): Deployed a high-precision geospatial and drone intelligence application integrated with WebODM for critical sovereign infrastructure mapping.

The Malaysian Government (Federal): Developing AI based architecting a centralized healthcare administration ecosystem to optimize hospital resource groups and clinical data infrastructure at a national scale.

The Team... BEHIND OUR SUCCESS

INLEADS IT

AT A GLANCE
