

ALUMARINE
We Make Quality

ALUMARINE
ENGINEERING SDN BHD
We Make Quality

INTRODUCTION

ALUMARINE ENGINEERING SDN BHD, established in October 2018, has rapidly emerged as a prominent player in the marine and engineering sectors. The company was founded with a strong foundation in ship fabrication and repair, specializing in steel and aluminium hulls, as well as piping systems. Building Facilities Maintenance on this initial expertise, Alumarine Engineering has expanded its operations to actively engage in offshore and onshore operations and maintenance, providing crucial workforce supply for the energy industry, local authorities, and private sectors. The company also plays a vital role in manpower supply and oil and gas services.

At the heart of Alumarine Engineering's success are its core values: discipline, safety, commitment, teamwork, quality, and quantity. These principles have effectively guided the company's growth and transformation, positioning it for continued success and leadership in the future. The company's unwavering dedication to these values ensures the delivery of high-quality products and services in every operation, fostering a win-win relationship with its customers.

Vision, Mission & Core Values

Vision

To be the leading and most trusted partner in marine and engineering solutions, recognized for our quality, innovation, and commitment to excellence.

Mission

To deliver superior engineering, fabrication, and maintenance services for the marine, oil & gas, and infrastructure sectors. We are dedicated to providing safe, reliable, and cost-effective solutions that exceed client expectations, while fostering a culture of discipline, teamwork, and continuous improvement.

Core Values

Integrity

Upholding the highest ethical standards in all our dealings.

Innovation

Continuously seeking new and better ways to deliver solutions.

Safety

Prioritizing the well-being of our people and the environment.

Excellence

Striving for superior quality and performance in every aspect of our work.

Corporate Structure & Strategy

Objectives & Strategic Goals

ALUMARINE ENGINEERING SDN BHD is driven by a clear set of objectives and strategic goals designed to ensure sustainable growth, operational excellence, and continued leadership in its target markets. Our strategic roadmap is built upon a foundation of continuous improvement and a forward-looking approach to industry challenges.

Company Objectives

- Achieve market leadership in specialized marine vessel fabrication and repair services.
- Expand our footprint in offshore and onshore operations and maintenance contracts.
- Become a preferred partner for comprehensive Facilities Maintenance solutions across diverse industries.
- Foster a culture of continuous learning and development among our workforce to enhance technical capabilities.
- Maintain robust financial health to support strategic investments and long-term stability.

Organizational Chart

Business Divisions

ALUMARINE ENGINEERING SDN BHD operates through three primary business divisions, each specializing in critical sectors: Marine, Infrastructure, and Oil & Gas. This diversified approach allows us to leverage our core competencies across various industries, providing comprehensive and integrated solutions to a broad spectrum of clients.

Marine

Specializing in vessel fabrication, repair, and maintenance.

Infrastructure

Focusing on civil construction projects, including roads, bridges, and buildings Facilities Maintenance.

Oil & Gas

Providing operations, maintenance, and manpower supply for offshore

Oil & Gas Division

Our Oil & Gas Division provides critical support and specialized services to both offshore and onshore energy sectors. ALUMARINE ENGINEERING SDN BHD is a trusted partner in ensuring the operational efficiency, safety, and integrity of oil and gas facilities.

Operations & Maintenance

- Rotating Equipment (Pumps, Gas Turbines, Compressors, Generators)
- Tank Maintenance (Fabrication, Cleaning, Repair)
- Static Equipment (Boilers, Pressure Vessels, Heat Exchangers)

Topside Maintenance

- Inspection & Non-Destructive Testing (NDT)
- Vessel Cleaning & Painting
- Hydro-Blasting Services

EPCC Services

- Engineering, Procurement, Construction & Commissioning
- Manpower Supply for Energy Sector
- Supply Chain & Equipment Sourcing
- Hardware & Materials Supply

Marine Division

Our Marine Division stands as a cornerstone of ALUMARINE ENGINEERING SDN BHD, offering a comprehensive suite of services for vessel fabrication, repair, and maintenance. With strategically located fabrication yards in Lukut, Sandakan, and Pasir Gudang, Malaysia, we are equipped to handle projects of varying scales and complexities.

Core Services

- Vessel Fabrication & Repair
- Welding & Fabrication
- Machinery Repair & Overhaul
- Electrical, Automation & Control Engineering
- Calibration Services

Specialized Services

- LSA & FFE Equipment Testing
- Cargo Hold & Tank Cleaning
- Marine Survey & Underwater Inspection
- Crane Load Test & Equipment Services
- Naval Architecture Services

Infrastructure Division

The Infrastructure Division of ALUMARINE ENGINEERING SDN BHD is dedicated to providing high-quality construction and engineering solutions. With expertise in civil construction projects, the division focuses on essential infrastructure development, ranging from transportation networks to large-scale industrial and commercial projects. By leveraging advanced engineering techniques and a skilled workforce, the division ensures the successful delivery of each project, with a strong emphasis on safety, reliability, and sustainability.

Core Services:

- **Building Construction:**

Specializing in the construction of commercial, residential, and industrial buildings, ensuring structural integrity and adherence to safety regulations.

- **Structural Engineering:**

Providing innovative structural engineering solutions for various infrastructure projects, ensuring that buildings, bridges, and other structures are designed for stability and longevity.

- **Civil Works:**

Offering a wide range of civil works, including site development, earthworks, drainage systems, and foundations for large-scale infrastructure projects.

- **Civil Works:**

Offering a wide range of civil works, including site development, earthworks, drainage systems, and foundations for large-scale infrastructure projects.

- **Project Management:**

Comprehensive project management services to oversee the timely and cost-effective completion of infrastructure projects, ensuring quality control and efficient execution from inception to handover.

Capabilities & Achievements

The Capabilities & Achievements section of ALUMARINE ENGINEERING SDN BHD reflects the company's strengths, technical expertise, and proven track record in delivering exceptional engineering, fabrication, and maintenance services. With a comprehensive range of services across marine, infrastructure, and oil & gas sectors, Alumarine Engineering has garnered a reputation for providing reliable, innovative, and high-quality solutions.

Core Competencies

• Advanced Fabrication Techniques:

Alumarine is equipped with state-of-the-art facilities and cutting-edge technology to carry out complex vessel fabrication and structural work. The company specializes in steel and aluminum hulls, welding, and the assembly of sophisticated systems for marine, infrastructure, and oil & gas sectors.

• Comprehensive Maintenance & Repair Services:

The company excels in the maintenance and repair of a wide variety of equipment and infrastructure. This includes rotating equipment (pumps, gas turbines, compressors), static equipment (boilers, pressure vessels, heat exchangers), and marine vessels, ensuring operational efficiency and safety.

• Integrated Engineering Solutions:

Alumarine Engineering offers integrated solutions that encompass the entire lifecycle of a project, from engineering design to fabrication, construction, and ongoing maintenance. This holistic approach guarantees optimal performance and longevity for all assets.

Certifications & Approvals

• MOF EE License:

Ensures that Alumarine meets the necessary financial and technical standards for government projects in Malaysia.

• CIDB G6 License:

A key certification for handling large-scale construction projects, particularly in the infrastructure sector.

• PETRONAS License:

Grants approval for Alumarine to work within the oil and gas sector, reinforcing its credibility and expertise in this field.

• BUMIPUTERA License:

Demonstrates Alumarine's commitment to supporting the local economy and engaging with local communities.

Past Projects / Major Clients

ALUMARINE ENGINEERING SDN BHD has a proven track record of delivering complex and high-quality projects across multiple industries, particularly in the marine, oil & gas, and infrastructure sectors. The company has earned a reputation for reliability, innovation, and commitment to excellence, which is reflected in the successful completion of various projects for both government agencies and private clients.

Selected Past Projects

Marine Vessel Fabrication

Alumarine Engineering has played a pivotal role in the fabrication of specialized vessels for both government and private sector clients. This includes vessels designed for specific operational needs such as offshore oil & gas platforms, cargo vessels, and research vessels.

Offshore Platform Maintenance:

Alumarine has provided routine maintenance and turnaround services for offshore platforms in the oil and gas sector. These services ensure the operational efficiency and safety of critical offshore facilities, contributing to the uninterrupted functioning of vital energy infrastructure.

Facilities Maintenance:

Alumarine Engineering has successfully delivered a wide range of facilities maintenance projects across industrial and commercial sectors. These services include preventive and corrective maintenance, asset integrity management, mechanical and electrical works, and facility support services. Our facilities maintenance solutions ensure optimal asset performance, operational reliability, regulatory compliance, and extended lifecycle of critical infrastructure for clients.

Facilities Maintenance

The company has been involved in large-scale civil infrastructure projects, including the design and construction of roads and bridges. These projects are aimed at improving transportation networks and enhancing connectivity in key areas.

Building Construction and Structural Engineering:

Alumarine Engineering has delivered several commercial and residential building projects. The company specializes in structural engineering, offering solutions for both low-rise and high-rise developments.

Awards & Certifications

ALUMARINE ENGINEERING SDN BHD is committed to upholding the highest standards of quality, safety, and operational excellence, a commitment recognized through various awards and certifications.

Industry Excellence ISO Compliance

Recognition for outstanding project delivery and client

Adherence to international quality and environmental

Safety Awards

Recognition for maintaining the highest safety

Key Certifications

CIDB G6 License

Construction Industry Development Board certification for large-scale projects

PETRONAS License

Essential for Malaysian oil and gas sector participation

MOF Certifications

Ministry of Finance approvals including Bumiputera Status

Vendor Certifications

Approved vendor status with major corporations and agencies

Health, Safety & Environment (HSE)

At ALUMARINE ENGINEERING SDN BHD, Health, Safety, and Environment (HSE) are paramount. Our unwavering commitment to HSE is embedded in every aspect of our operations, ensuring the well-being of our employees, contractors, clients, and the communities in which we operate.

We believe all injuries are preventable

Safety First

Prioritizing worker safety in all operations

Environmental Care

Protecting the environment we operate in

Continuous Improvement

Striving for industry-leading HSE performance

HSE Policy Highlights

- Leadership demonstrates visible commitment to HSE implementation
- Systematic risk management approach reducing risks to ALARP
- Strict compliance with all HSE legislation and regulations
- Comprehensive training and education for all personnel
- Active stakeholder engagement and consultation

Corporate Culture & Social Impact

CSR Initiatives

ALUMARINE ENGINEERING SDN BHD is deeply committed to corporate social responsibility (CSR), recognizing our role in contributing positively to society and the environment. Our CSR initiatives are designed to create sustainable impact, foster community engagement, and promote environmental stewardship.

● Community Development

We actively participate in local community development projects, including educational support programs, infrastructure improvements, and initiatives aimed at enhancing the quality of life for residents in areas where we operate.

● Employee Volunteerism

We encourage and support our employees to volunteer their time and skills for various charitable causes, fostering a culture of giving back and social responsibility within the company.

● Environmental Stewardship

Our commitment to the environment extends beyond compliance. We engage in programs such as tree planting, waste reduction campaigns, and promoting sustainable practices within our operations and supply chain.

● Skills Development

We invest in programs that provide technical training and skills development to local communities, particularly focusing on marine and engineering trades, thereby contributing to local economic empowerment.

Innovation & Technology

At ALUMARINE ENGINEERING SDN BHD, innovation is at the heart of the company's strategy for maintaining its competitive edge and delivering superior solutions to its clients. By embracing cutting-edge technology and continuously exploring new methodologies, the company enhances its operational efficiency, safety standards, and the quality of its services. Innovation is not just about staying ahead in technology but also about providing smarter, more effective solutions to meet the evolving needs of the marine, oil & gas, and infrastructure sectors.

Future-Ready Technology Solutions

Digital Tools

Alumarine Engineering utilizes advanced project management software to streamline workflows, ensure timely delivery of projects, and maintain clear communication with all stakeholders. These digital tools enable real-time updates, efficient resource management, and optimized project timelines, improving overall project delivery and client satisfaction.

Research & Development (R&D)

Focus:

Alumarine maintains a strong focus on R&D to continuously innovate and adapt to changing industry requirements. This includes the development of specialized engineering solutions for complex challenges in marine technology and sustainable infrastructure.

Data Analytics

The company leverages data-driven insights to improve operational decision-making. By analyzing key performance metrics, equipment performance, and maintenance history, Alumarine can predict issues before they arise, optimize maintenance schedules, and reduce downtime.

Automation and Robotics in Maintenance

In its offshore and onshore operations, Alumarine has introduced automation and robotics to enhance the accuracy, safety, and speed of maintenance services. Automated systems are used for non-destructive testing (NDT), underwater inspections, and hydro-blasting, reducing the risk to human workers while ensuring the highest standards of quality and safety.

Contact & Closing

Testimonials & Partnerships

At ALUMARINE ENGINEERING SDN BHD, our success is built on strong relationships and the trust our clients place in us. We are proud of the positive feedback we receive and the enduring partnerships we have forged.

"Alumarine Engineering delivered our vessel repair project ahead of schedule and within budget. Their professionalism and attention to detail were exceptional. We highly recommend their services."

- Government Agency Client

"We were impressed by Alumarine Engineering's professional and reliable facilities maintenance services. Their proactive approach, timely response, and ongoing support have significantly improved the operational performance and reliability of our facilities. The team's commitment to quality and safety has been invaluable."

- GLC Client

"The team at Alumarine demonstrated deep expertise in managing our offshore maintenance operations. Their proactive approach to safety and efficiency significantly contributed to our project's success."

Marine Division

Choosing ALUMARINE ENGINEERING SDN BHD means partnering with a company dedicated to delivering superior results through expertise, integrity, and a client-centric approach. Our distinct advantages set us apart in the competitive marine and engineering landscape.

Experienced Team

A highly skilled and dedicated workforce with extensive industry experience and technical proficiency.

Proven Track Record

A history of successfully delivering complex projects on time and within budget, consistently exceeding client expectations.

Safety First Culture

An unwavering commitment to the highest standards of health, safety, and environmental protection in all operations.

Comprehensive Solutions

Offering a wide range of integrated services across marine, infrastructure, and oil & gas sectors.

Innovation & Technology

Embracing cutting-edge technologies and innovative approaches to deliver efficient, sustainable solutions.

Client-Centric Approach

Dedicated to understanding and responding to client needs with tailored solutions and exceptional service.
