COMPANY PROFILE

GREEN HEAVEN METALS SDN. BHD.

DATA CENTRE RECYCLING & INDUSTRIAL ASSET RECOVERY SPECIALIST

Secure data centre decommissioning, IT asset disposition, certified data destruction, e-waste recycling and sustainable asset recovery solutions.

COMPANY SNAPSHOT

Green Heaven Metals Sdn. Bhd. is a Malaysian integrated recycling and industrial decommissioning company specialising in secure data centre recycling, IT asset disposition, data destruction, e-waste management and sustainable asset recovery.

Established in 2009, the company brings more than 16 years of industry experience, supporting technology companies, manufacturers, infrastructure operators and multinational organisations across Malaysia.

AT A GLANCE

Established	2009
Industry Experience	16+ Years
Core Expertise	Data Centre Recycling & Industrial Asset Recovery
Key Services	Data Centre Decommissioning, ITAD, Secure Data Destruction, E-Waste Recycling and Industrial Dismantling
Contractor Registration	CIDB Grade G5
Project Capability	Construction works up to RM5 million under the G5 classification
Service Coverage	Malaysia
Commitment	Data Security, Safety, Environmental Compliance and Sustainability

Secure Recycling. Sustainable Future.

ABOUT GREEN HEAVEN

Green Heaven Metals Sdn. Bhd. is a Malaysian integrated recycling and industrial decommissioning company specialising in data centre recycling, IT asset disposition, secure data destruction, e-waste management and sustainable asset recovery.

Established in 2009, we have built more than 16 years of industry experience, supporting multinational corporations, technology companies, manufacturers, logistics providers and infrastructure operators across Malaysia.

Our team combines technical expertise, safe operating practices, efficient logistics and responsible recycling methods to manage complex projects from initial assessment through dismantling, recovery, recycling and final documentation. We are committed to protecting sensitive data, maximising asset value and reducing environmental impact through secure and sustainable solutions.

Secure Recycling. Sustainable Future.

SUSTAINABLE SOLUTIONS
Environmentally responsible recycling practices.

SECURE & COMPLIANT
Protecting data, ensuring compliance and peace of mind.

EXPERIENCED & RELIABLE
16+ years of proven industry expertise and track record.

A GREENER TOMORROW
Committed to reducing waste and building a sustainable future.

VISION

To create a sustainable and environmentally responsible future by reducing waste, promoting responsible recycling and maximising the recovery of valuable resources.

MISSION

To deliver secure, safe and efficient recycling, data centre decommissioning and asset recovery solutions while building long-term partnerships with our clients.

We are committed to protecting sensitive data, minimising environmental impact and encouraging innovation, teamwork and continuous improvement across our operations.

CORPORATE VALUES

Integrity : We operate with honesty, transparency and accountability.

Safety : We prioritise the wellbeing of our employees, clients and communities in every project.

Sustainability : We promote responsible recycling, resource recovery and environmentally compliant disposal.

Excellence : We strive for high-quality execution, reliability and continuous improvement.

Partnership : We build strong, long-term relationships with clients, employees and stakeholders.

Innovation : We embrace practical technologies and better methods to improve security, efficiency and environmental performance.

WHY CHOOSE GREEN HEAVEN?

With more than 16 years of industry experience, Green Heaven Metals Sdn. Bhd. delivers secure, reliable and environmentally responsible solutions for data centre recycling, IT asset recovery and industrial decommissioning projects across Malaysia.

DATA CENTRE EXPERTISE

Experienced in dismantling server racks, UPS systems, batteries, cable trays, CRAC units and other critical IT infrastructure.

END-TO-END SOLUTIONS

From site assessment and dismantling to transportation, recycling, reporting and final certification, we manage the complete process.

RELIABLE PROJECT EXECUTION

Our experienced team combines technical knowledge, logistics capability and strong safety practices to complete projects efficiently.

SECURE ASSET HANDLING

Retired equipment is managed through strict handling and chain-of-custody procedures to protect confidential information.

MAXIMUM ASSET RECOVERY

We identify reusable equipment and recover valuable materials to deliver competitive returns from retired assets.

SUSTAINABLE & RESPONSIBLE

We minimise landfill waste, maximise resource recovery and support clients in achieving their ESG and sustainability goals.

LICENSED & RECOGNISED

Green Heaven is registered as a CIDB Grade G5 contractor, reinforcing our ability to undertake specialised dismantling and industrial works.

Protecting Your Data. Powering a Greener Tomorrow.

OUR
CORE SERVICES

Green Heaven Metals Sdn. Bhd. provides secure and sustainable recycling, decommissioning and asset recovery solutions across Malaysia.

DATA CENTRE DECOMMISSIONING

Complete dismantling and removal of server racks, raised floors, cable trays, structured cabling, UPS systems, batteries, generators, transformers and CRAC units.

IT ASSET DISPOSITION (ITAD)

Secure collection, inventory, evaluation, reuse, resale and recycling of retired servers, storage systems, computers and network equipment.

DATA CENTRE DECOMMISSIONING

Complete dismantling and removal of server racks, raised floors, cable trays, structured cabling, UPS systems, batteries, generators, transformers and CRAC units.

SECURE DATA DESTRUCTION

Confidential destruction and erasure of HDDs, SSDs and other storage media through shredding, degaussing and controlled on-site or off-site processes.

E-WASTE RECYCLING

Responsible collection, segregation and recycling of obsolete electronic equipment to maximise material recovery and minimise landfill disposal.

INDUSTRIAL DISMANTLING & DEMOLITION

Safe dismantling of factories, warehouses, machinery, structural steel, tanks and industrial infrastructure.

ASSET RECOVERY & METAL RECYCLING

Recovery of reusable equipment, cables, metals and valuable materials to generate competitive returns from retired assets.

COLLECTION & LOGISTICS

Professional asset packing, loading, transportation and site coordination with secure handling throughout the chain of custody.

ESG & COMPLIANCE DOCUMENTATION

Recycling certificates, destruction records, asset reports and disposal documentation to support environmental compliance and sustainability objectives.

DATA CENTRE
RECYCLING & DECOMMISSIONING

Green Heaven provides complete end-to-end data centre recycling and decommissioning solutions for organisations upgrading, relocating or retiring their IT infrastructure. Our experienced team manages the entire process—from initial site assessment and asset identification to dismantling, transportation, recycling and final documentation.

We apply secure handling procedures throughout every stage to protect sensitive equipment, minimise operational disruption and maintain a clear chain of custody. Reusable assets are carefully evaluated for recovery, while obsolete equipment and materials are processed through responsible recycling channels to maximise value and reduce environmental impact.

OUR CAPABILITIES

- Server rack and network equipment dismantling
- Raised-floor and cable tray removal
- Structured cabling and metal recovery
- UPS system and battery bank disposal
- CRAC unit dismantling
- Generator and transformer removal
- Secure IT asset collection and transportation
- Equipment segregation and asset recovery
- Site clearance and recycling documentation

Our solutions combine data security, technical expertise, safe project execution and sustainable recycling practices to support data centres across Malaysia.

IT ASSET DISPOSITION
& ASSET RECOVERY

Green Heaven provides secure and sustainable IT Asset Disposition (ITAD) solutions for organisations managing obsolete, surplus or end-of-life technology equipment. Our services help clients protect confidential information, recover maximum value from retired assets and meet environmental and ESG responsibilities.

Every asset is carefully collected, identified, segregated and evaluated for reuse, resale, recycling or secure disposal. Our team maintains controlled handling procedures throughout the process to ensure accountability, data protection and responsible downstream recycling.

OUR SERVICES

- Server, storage and network equipment recovery
- Laptop, desktop and peripheral disposal
- Asset inventory and serial-number recording
- Equipment testing, grading and valuation
- Reuse, resale and remarketing assessment
- Secure collection and transportation
- Metal and component recovery
- Certified recycling and disposal
- Asset recovery and recycling reports

Through an efficient and transparent ITAD process, Green Heaven helps clients reduce electronic waste, improve resource recovery and generate competitive value from retired IT assets.

SECURE DATA
DESTRUCTION & DATA ERASURE

Green Heaven provides secure and compliant data destruction solutions to protect confidential information stored on retired IT equipment. Our controlled process ensures that sensitive data is permanently removed or physically destroyed before the equipment enters the recycling or asset recovery stream.

We support both on-site and off-site destruction, with strict asset handling and chain-of-custody procedures throughout collection, verification, destruction and final disposal. Upon completion, clients may receive supporting records and certificates for audit, compliance and ESG reporting purposes.

OUR SERVICES

- HDD shredding and physical destruction
- SSD and solid-state media destruction
- Secure data erasure and wiping
- Degaussing of magnetic storage devices
- On-site and off-site destruction
- Serial-number recording and asset tracking
- Secure collection and transportation
- Certificate of destruction issuance
- Responsible recycling of destroyed materials

Our approach combines data security, accountability and environmentally responsible recycling, giving clients confidence that their information and retired assets are managed safely and professionally.

E-WASTE COLLECTION
& RESPONSIBLE RECYCLING

Green Heaven provides professional e-waste collection and recycling services for obsolete, damaged and end-of-life electronic equipment. Our solutions help organisations manage electronic waste securely, responsibly and in line with environmental best practices.

Collected equipment is carefully sorted, dismantled and processed to recover reusable components, valuable metals and recyclable materials. Non-recoverable items are directed through appropriate disposal channels to minimise landfill waste and reduce environmental impact.

OUR SERVICES

- Collection of computers, servers and network equipment
- Recycling of laptops, desktops and electronic peripherals
- Secure handling of storage devices and data-bearing assets
- Segregation and dismantling of electronic components
- Recovery of metals, cables and reusable materials
- Responsible downstream recycling and disposal
- Collection, transportation and logistics coordination
- Recycling records and supporting documentation

Through responsible e-waste management, Green Heaven supports the circular economy, improves material recovery and helps clients achieve their environmental and ESG objectives.

INDUSTRIAL DISMANTLING & HEAVY ASSET RECOVERY

Green Heaven provides safe and efficient dismantling, demolition and asset recovery services for factories, warehouses, plants and industrial facilities. Our experienced team manages complex removal works with careful planning, appropriate machinery and strict safety controls.

We handle projects from initial site assessment and equipment isolation through dismantling, lifting, transportation, material segregation and final site clearance. Reusable machinery, structural steel, cables and valuable metals are identified for recovery, while non-reusable materials are processed through responsible recycling channels.

OUR CAPABILITIES

- Factory and warehouse dismantling
- Plant and production-line decommissioning
- Heavy machinery removal and disposal
- Structural steel dismantling and recovery
- Industrial tank and equipment removal
- Heavy lifting and transportation coordination
- Cable, metal and material recovery
- Site clearing and waste segregation
- Recycling and disposal documentation

Green Heaven has experience managing large industrial assets weighing up to approximately 267,000 kg, demonstrating our ability to execute demanding recovery projects safely and professionally.

END-TO-END
PROJECT DELIVERY PROCESS

Green Heaven follows a structured project approach to ensure every data centre, IT asset and industrial recovery project is completed safely, securely and efficiently.

01. SITE ASSESSMENT

We inspect the site, confirm the project scope and identify assets, access requirements and operational risks.

02. ASSET INVENTORY & VALUATION

Equipment is recorded and evaluated for reuse, resale, recycling, material recovery or secure disposal.

03. PLANNING & RISK MANAGEMENT

A detailed work plan is prepared covering manpower, machinery, safety procedures, logistics and project scheduling.

04. SAFE DISMANTLING

Our experienced team carefully dismantles IT infrastructure, machinery, cabling and industrial equipment while minimising disruption.

05. SECURE DATA DESTRUCTION

Data-bearing devices are erased, shredded or destroyed through controlled chain-of-custody procedures.

06. SEGREGATION & RECOVERY

Reusable equipment, metals, cables and recyclable materials are separated to maximise recovery value.

07. TRANSPORTATION & RECYCLING

Assets are securely packed, loaded and transported for responsible recycling or approved disposal.

08. REPORTING & CERTIFICATION

Clients receive relevant asset records, destruction certificates, recycling reports and disposal documentation.

This complete process ensures data security, workplace safety, environmental responsibility and full project accountability.

OUR CLIENTS

Green Heaven is trusted by organisations across the technology, manufacturing, energy, banking and industrial sectors. Our clients rely on us for secure asset handling, responsible recycling, industrial dismantling and reliable project execution.

SELECTED CLIENTS

- DXC Technology
- Dell Technologies
- Sensata Technologies
- Bank Negara Malaysia
- Linde Malaysia
- Vertiv
- Sapura Energy
- Scomi Energy Services
- ONKYO
- Hanwha Q Cells
- Emerson Network Power

We value every partnership and remain committed to delivering safe, secure and environmentally responsible solutions tailored to each client's operational needs. The client logos are presented on page 15 of the existing company profile.

REGISTRATIONS & CERTIFICATIONS

Green Heaven maintains relevant registrations and approvals to support safe, compliant and professional recycling, dismantling and asset recovery operations.
