COMPANY INTRODUCTION

HER Clinic is a doctor-led aesthetic and skin clinic dedicated to helping individuals look and feel their best through safe, personalised and medically guided treatments. Established in Malaysia, the clinic provides advanced non-surgical solutions for skin health, facial rejuvenation, anti-aging, body contouring and overall aesthetic enhancement.

Every patient begins with a professional consultation conducted by qualified medical practitioners. The clinic's doctors carefully assess each individual's skin condition, concerns and aesthetic goals before recommending a suitable treatment plan. This personalised approach ensures that every procedure is performed with precision, transparency and a strong focus on patient safety.

Supported by LCP-certified and Malaysian Medical Council-registered doctors, HER Clinic combines medical expertise with clinically validated technologies, authentic medical-grade products and evidence-based treatment methods. Its services include acne-scar improvement, pigmentation treatment, skin boosters, facial contouring, injectables, non-surgical lifting, laser procedures and body-sculpting solutions.

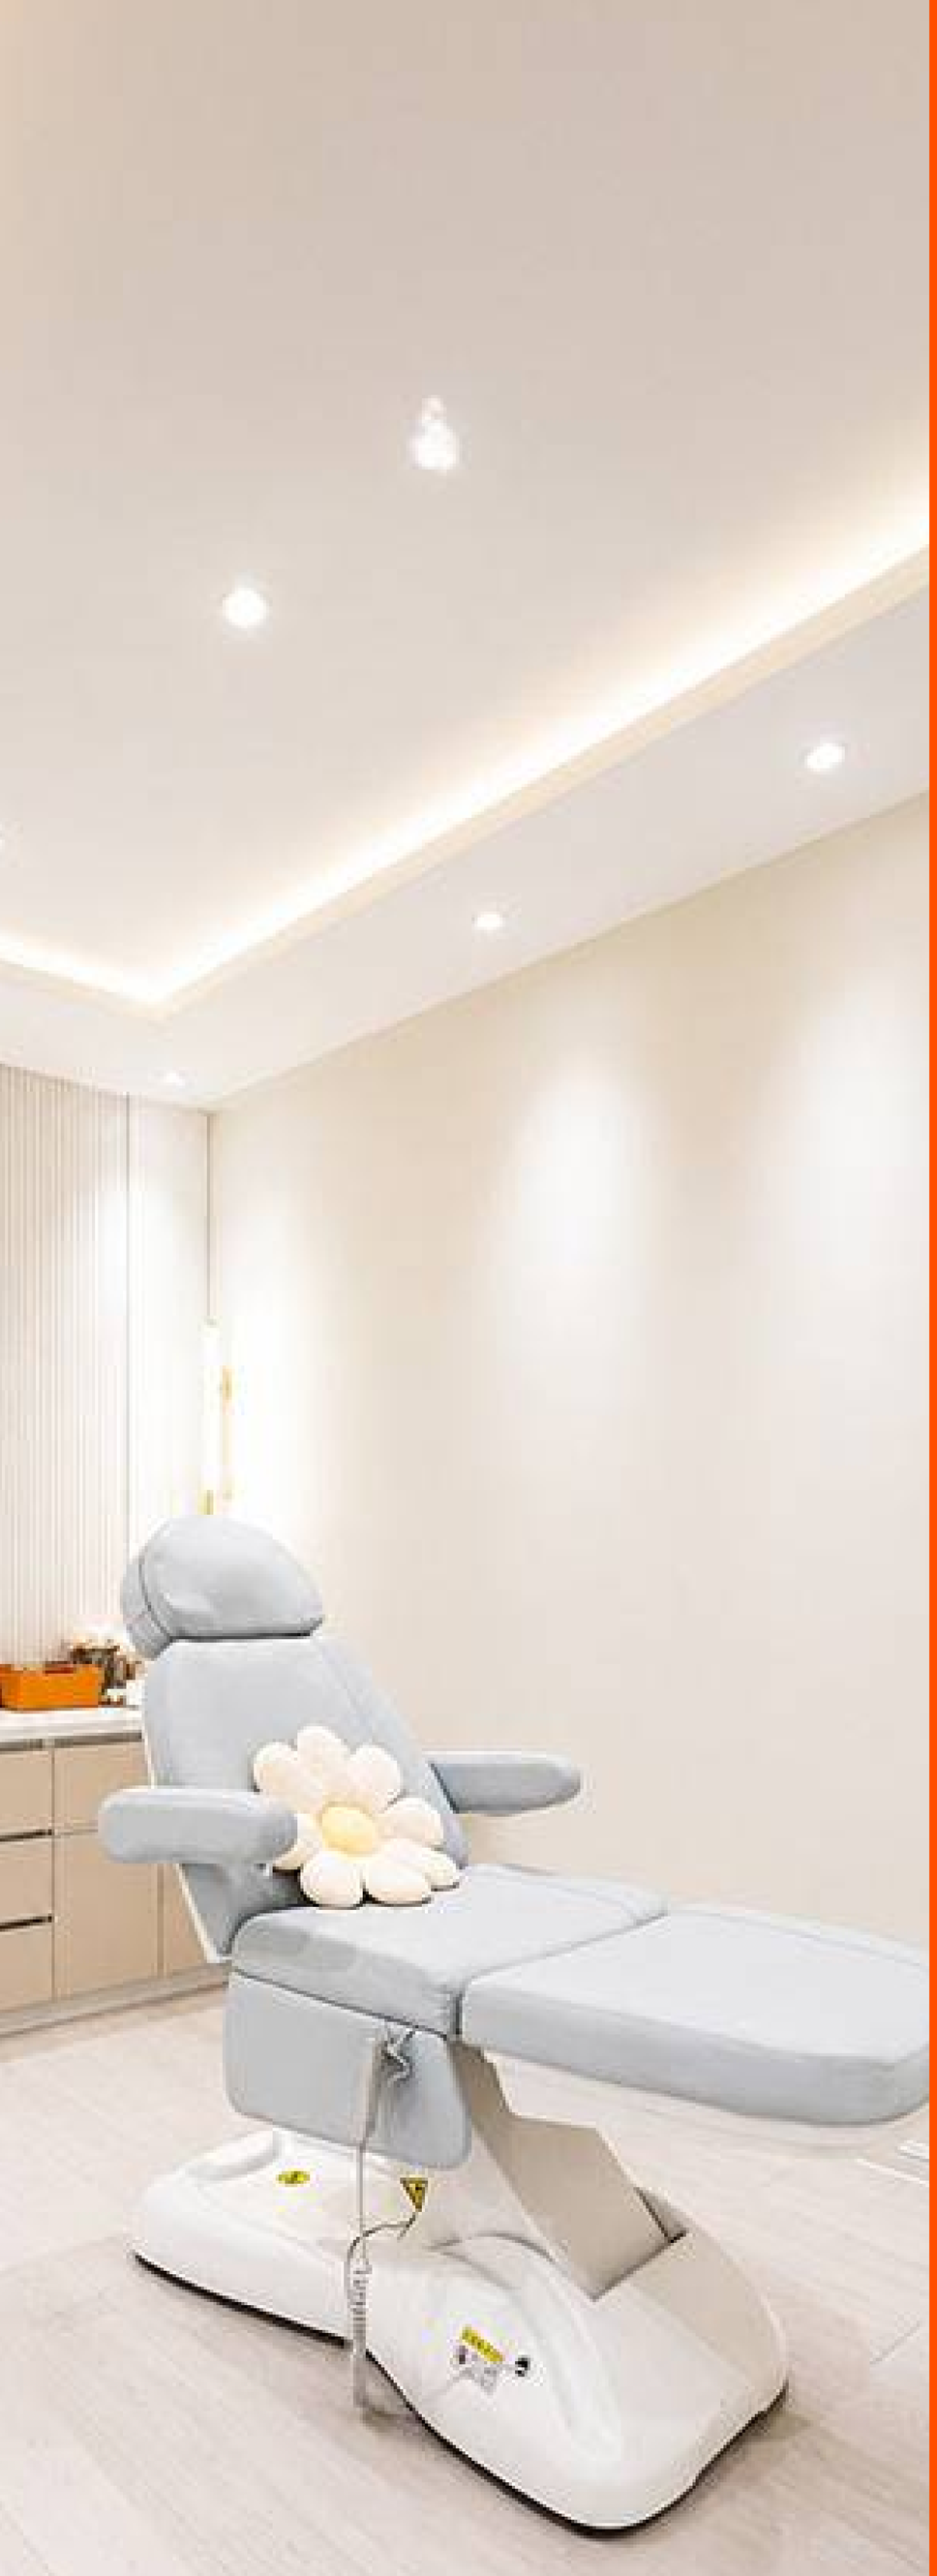

With welcoming clinics located in Kuala Lumpur, Petaling Jaya and Johor Bahru, HER Clinic strives to deliver a comfortable and professional experience at every stage of the patient journey. Through responsible aesthetic care and a commitment to natural-looking results, the clinic empowers every patient to enhance their unique beauty and regain confidence in their appearance.

ABOUT HER CLINIC

HER Clinic is a doctor-led medical aesthetic clinic dedicated to helping individuals achieve healthier skin, balanced facial features and greater confidence through safe, personalised treatments.

Established in Malaysia, the clinic offers a comprehensive range of non-surgical aesthetic solutions, including skin rejuvenation, acne-scar treatment, pigmentation management, facial contouring, anti-aging procedures and body-contouring treatments. Every patient receives a detailed consultation and a customised treatment plan based on their individual concerns, skin condition and desired results.

Supported by qualified medical practitioners, modern technologies and medical-grade products, HER Clinic places strong emphasis on patient safety, professional integrity and natural-looking outcomes. Rather than changing a person's identity, the clinic aims to enhance their unique features while maintaining harmony and authenticity.

With conveniently located branches in Kuala Lumpur, Petaling Jaya and Johor Bahru, HER Clinic provides a comfortable, welcoming and professional environment where patients can begin their aesthetic journey with confidence.

VISION

To become one of Malaysia's most trusted medical aesthetic clinics, recognised for clinical excellence, personalised care and naturally beautiful results.

MISSION

To provide safe, evidence-based and doctor-led aesthetic treatments using advanced technologies, professional expertise and customised solutions that enhance each patient's confidence and well-being.

CORE VALUES

Patient Safety
We place patient health, comfort and well-being at the centre of every treatment.

Medical Integrity
We provide honest advice, responsible recommendations and treatments guided by professional medical standards.

Personalised Care
Every patient receives a treatment plan tailored to their individual concerns, features and goals.

Natural Results
We enhance each person's unique beauty while maintaining balance, harmony and authenticity.

Clinical Excellence
We continuously improve our knowledge, techniques and technology to deliver high-quality aesthetic care.

Trust and Transparency
We build lasting relationships through clear communication, ethical practices and dependable service.

WHY CHOOSE HER CLINIC?

Doctor-Led Expertise

Treatments are performed and supervised by qualified medical practitioners who prioritise safety, suitability and professional care.

Personalised Treatment Plans

Every patient receives a detailed consultation and customised recommendations based on their skin condition, concerns and desired outcomes.

Advanced Aesthetic Technology

HER Clinic combines modern medical-aesthetic technologies with clinically guided techniques to deliver effective, non-surgical solutions.

Natural-Looking Results

The clinic focuses on enhancing each patient’s unique features while maintaining facial balance, harmony and authenticity.

Comprehensive Treatments

From acne scars and pigmentation to skin rejuvenation, facial enhancement, anti-aging and body contouring, HER Clinic offers complete aesthetic solutions under one trusted brand.

Safe and Comfortable Experience

Patients are supported throughout their journey in a professional, welcoming and comfortable clinical environment.

Convenient Locations

With branches in Kuala Lumpur, Petaling Jaya and Johor Bahru, quality aesthetic care is easily accessible to patients across Malaysia.

Medical Expertise. Personalised Care. Confidence in Every Result.

OUR MEDICAL EXPERTS

HER Clinic’s medical team combines professional expertise, international medical training and a patient-centred approach to aesthetic care. Each treatment begins with a careful assessment, ensuring recommendations are personalised, medically appropriate and focused on achieving safe, natural-looking results.

Dr. Jeff Khor

LCP-Certified Aesthetic Physician
Doctor of Medicine, Volgograd State Medical University
Malaysian Medical Council Registration No. 66113

Dr. Jeff Khor specialises in non-surgical facial rejuvenation, injectables, skin boosters, laser treatments, skin tightening and advanced aesthetic procedures. His approach combines clinical precision with a detailed understanding of facial anatomy and individual skin needs.

Dr. Darren Wang

LCP-Certified Doctor
Lviv National Medical University
Malaysian Medical Council Registration No. 68601

Dr. Darren Wang provides evidence-based aesthetic treatments with a strong focus on patient safety, personalised planning and natural outcomes. His expertise supports patients seeking skin rejuvenation, facial enhancement and advanced non-surgical solutions.

Dr. Billy Lee

Aesthetic Doctor
I.M. Sechenov First Moscow State Medical University
Malaysian Medical Council Registration No. 94031

Dr. Billy Lee contributes international medical training and a personalised approach to aesthetic care. He carefully evaluates each patient’s concerns and goals before recommending treatments suited to their individual condition.

EXPERTISE GUIDED BY CARE

Together, HER Clinic’s medical experts are committed to ethical consultations, advanced treatment techniques and transparent patient guidance throughout every stage of the aesthetic journey.

OUR TREATMENT PHILOSOPHY

At HER Clinic, every aesthetic journey begins with understanding the individual. We believe that effective treatment is not about changing how a person looks, but enhancing their natural features through safe, thoughtful and medically guided care.

Personalised Consultation

Each patient receives a detailed consultation to assess their skin condition, facial structure, concerns and aesthetic goals before any treatment is recommended.

Safety and Integrity

Patient safety remains our highest priority. We provide honest advice, realistic expectations and responsible recommendations without encouraging unnecessary procedures.

Doctor-Led Planning

Our medical practitioners develop customised treatment plans based on clinical suitability, professional assessment and the patient’s desired outcome.

Natural and Balanced Results

Our approach focuses on subtle, harmonious improvements that complement each patient’s unique appearance and preserve their natural identity.

Continuous Patient Care

From consultation and treatment to aftercare and progress monitoring, our team provides guidance and support throughout every stage of the patient journey.

Personalised Treatments. Medical Precision. Naturally Confident Results.

ACNE SCAR AND SKIN TEXTURE SOLUTIONS

HER Clinic provides doctor-led treatments designed to improve acne scars, enlarged pores, uneven texture and post-acne marks. As every scar develops differently, treatment begins with a detailed skin assessment to identify the scar type, depth and overall skin condition.

Personalised Scar Assessment

The medical team evaluates rolling, boxcar and ice-pick scars before creating a customised treatment plan suited to the patient's skin type, concerns and recovery needs.

Advanced Treatment Options

Depending on clinical suitability, recommended solutions may include:

- RF Microneedling with Sylfirm X to stimulate collagen and improve deeper scars and enlarged pores.
- Pico Laser to address mild textural concerns and post-acne pigmentation.
- Fractional CO_2 Laser to resurface the skin and improve more visible textural irregularities.
- Subcision to release fibrous tissue beneath tethered or rolling acne scars.
- PRP or PRF Therapy to support natural skin repair and rejuvenation.

Combination Treatment Approach

Different scar types may require a combination of technologies and techniques. HER Clinic develops a structured treatment plan to support progressive collagen renewal, smoother skin texture and a clearer, more balanced complexion.

Smoother Texture. Healthier Skin. Renewed Confidence.

PIGMENTATION AND LASER TREATMENTS

HER Clinic provides doctor-led solutions for pigmentation concerns such as melasma, freckles, sunspots, age spots, post-inflammatory marks and uneven skin tone. Each treatment begins with a professional skin assessment to identify the type, depth and possible cause of the pigmentation.

Personalised Pigmentation Care

As pigmentation varies between individuals, the medical team creates a customised treatment plan based on the patient's skin type, condition and desired outcome.

Advanced Treatment Options

Depending on clinical suitability, recommended solutions may include:

- **Pico Laser** to target stubborn pigment using ultra-short energy pulses while minimising excessive heat.
- **Q-Switched Laser** to address freckles, sunspots and selected pigmentation concerns.
- **Chemical Peels** to remove damaged surface cells and promote skin renewal.
- **Medical-Grade Skincare** to manage melanin production and support treatment results.
- **Combination Treatments** for complex or recurring pigmentation conditions.

Clearer and More Even-Looking Skin

Treatments are performed using medical-grade technology and carefully selected settings. Patients also receive suitable aftercare guidance, including sun protection and skincare recommendations, to maintain a brighter and more balanced complexion.

Targeted Technology. Personalised Care. Radiant-Looking Skin.

SKIN REJUVENATION AND ANTI-AGING

HER Clinic provides personalised, doctor-led treatments designed to address visible signs of skin aging, including fine lines, dryness, uneven texture, enlarged pores, dullness and reduced firmness. Every treatment begins with a professional assessment to understand the patient's skin condition, concerns and desired results.

Personalised Rejuvenation Care

Treatment plans are carefully tailored according to the patient's age, skin type and clinical suitability. The goal is to improve overall skin quality while preserving natural facial expression and appearance.

Advanced Treatment Solutions

Depending on individual needs, recommended options may include:

- **Skin Boosters** to support deep hydration, smoother texture and a healthier-looking glow.
- **Rejuran and Regenerative Treatments** to promote skin repair, elasticity and revitalisation.
- **Collagen-Stimulating Injectables** to gradually improve firmness, fine lines and skin quality.
- **RF Microneedling and Laser Treatments** to refine pores, texture and visible signs of sun damage.
- **HIFU and Ultherapy Prime** to support non-surgical lifting and tightening.
- **Chemical Peels and Medical-Grade Skincare** to encourage surface renewal and a brighter complexion.

Natural and Progressive Results

HER Clinic focuses on subtle, balanced improvements rather than an artificial or overtreated appearance. Patients receive appropriate aftercare and progress monitoring to support safe, gradual and long-lasting skin rejuvenation.

Renewed Skin. Natural Beauty. Timeless Confidence.

FACE ENHANCEMENT AND NON-SURGICAL LIFTING

HER Clinic offers personalised, doctor-led treatments designed to enhance facial balance, restore youthful definition and improve skin firmness without surgery. Each treatment plan is carefully developed according to the patient's facial structure, concerns and desired results.

Personalised Facial Enhancement

The medical team assesses facial proportions, volume loss, skin laxity and overall symmetry before recommending suitable procedures. The goal is to create subtle improvements that complement the patient's natural features.

Advanced Treatment Options

Depending on individual needs, treatment options may include:

- **Dermal Fillers** to restore volume, refine facial contours and enhance areas such as the chin, lips, cheeks and nose.
- **Botulinum Toxin Treatments** to soften expression lines, support facial slimming and improve jawline definition.
- **HIFU and Ultherapy Prime** to lift and tighten the skin using focused ultrasound technology.
- **Collagen-Stimulating Treatments** to gradually improve firmness, structure and skin quality.
- **Combination Treatments** to achieve balanced, natural-looking facial rejuvenation.

Natural and Harmonious Results

HER Clinic focuses on enhancing rather than changing each patient's appearance. Treatments are performed with medical precision to preserve natural expressions while creating a refreshed, balanced and more confident look.

Refined Features. Natural Balance. Confident Beauty.

BODY CONTOURING AND SLIMMING

HER Clinic provides doctor-led, non-surgical body-contouring solutions designed to address localised areas of stubborn fat, loose skin and visible cellulite. Every treatment begins with a medical consultation to assess the patient's concerns, overall health and suitability for the procedure.

Personalised Body Assessment

The medical team evaluates the treatment area, skin condition and individual goals before developing a customised body-contouring plan. Common areas may include the abdomen, waist, arms, thighs, flanks and back.

ONDA Coolwaves Technology

HER Clinic offers ONDA Coolwaves, an advanced treatment that uses targeted microwave energy to support three key objectives:

- Reducing localised fat deposits
- Improving skin firmness and elasticity
- Smoothing the appearance of cellulite

The non-invasive procedure is designed to enhance body contours without surgery and generally requires minimal interruption to everyday activities.

Safe and Responsible Care

Body contouring is intended to refine specific areas rather than serve as a substitute for healthy weight management. Treatments are recommended only after professional assessment and are supported by appropriate guidance and aftercare.

Advanced Technology. Personalised Care. Naturally Refined Contours.

CLINICAL EXCELLENCE, AWARDS AND LOCATIONS

HER Clinic is committed to maintaining high standards of medical aesthetic care through qualified doctors, evidence-based treatments and advanced medical-grade technologies. Every procedure is guided by professional consultation, clinical suitability and a strong emphasis on patient safety, ethical practice and natural-looking results.

Awards and Recognition

HER Clinic's commitment to aesthetic excellence has been recognised through several achievements featured by the clinic, including:

- Plinest 2025
- Skinvive 2025
- Juvederm 2025
- Sculptra 2024
- Sculptra 2025
- Ultherapy Prime 2025
